page D: Independent recheck

Directions: Work on your own. Use a drawing or explain your groups in words. Label every answer.

1. You have **11/16 meter** of cord. A complete craft uses **3/8 meter**. How many crafts' worth do you have, counting a partial craft? How much cord is left after making all the complete crafts? Use an equation and explain why your two answers have different units.

2. A printer uses **5/12 meter** of paper for **2/3 of a banner**. At the same rate, how much paper is needed for a full banner? Check your answer with multiplication.
