Exit Tickets: Four Fresh Checks

One-Question Evidence Check: Reading a character's actions

During a club demonstration, Priya stood behind the table with a stack of directions. When two visitors stopped, she looked down at the cards. After her partner showed a visitor the first step, Priya moved beside him and explained the next one. What might have helped Priya join the demonstration? Use one detail and explain how it supports your idea.

My answer and reasoning:

Focused 3-2-1: Read and compare temperature changes

Cup C falls from 47°C to 42°C in 8 minutes. Cup D falls from 53°C to 46°C in the same 8 minutes. Which cup cooled more? Show both drops.

My answer and reasoning:

Misconception Check: Equivalent fractions

Niko says 2/3 and 3/4 are equal because the numerator and denominator each went up by one. Compare both fractions using twelfths. Correct the claim and explain why your comparison works.

My answer and reasoning:

Confidence and Evidence: Choose a source for a historical question

Two fictional sources describe the reopening of a neighborhood library. Source C is the city calendar for September 12 listing a 9 a.m. ribbon cutting. Source D is a reporter's article from that day saying the ceremony began at 9:20 a.m. Which source better answers when the ceremony *actually* began? Explain what it can tell you.

My answer and reasoning:
