

Name the Quantity You Are Finding

Make the Question Clear

Return to these familiar lesson amounts. Point, label or explain before calculating.

1. Twenty counters go into 4 equal groups. Name the total, what the 4 counts, and what you need to find. Then find it.

2. Two meters of ribbon are shared among 3 projects. What is the total? What receives a share? Does your answer describe meters for one project or the number of projects? Draw or explain one share.
