

Connect Groups and Comparisons

Return to the Lesson Amounts

Use the 20-counter and 5 cm/15 cm situations from your lesson pages.

1. Use the 20 counters. Write one multiplication equation and two division equations. For each division, explain the given group role and the role it finds.

2. For the 5 cm and 15 cm strips, explain how the 3-copy comparison can be checked by division. Then explain why the difference is not 3 cm.
