

# Revisit Groups and Measured Shares

## Show the Roles and the Unit

Use the amounts below. Draw, label or explain.

1. Twenty-eight tiles are placed in groups of 7 tiles. Find the number of groups. Then explain how the question would change if 7 were the number of equal groups instead.

---

---

---

---

2. A 3 L amount is shared equally into 5 portions. Find one portion and explain what one whole means in your fractional answer.
