Discuss a way to share project questions

Invented decision: Should a club offer a question board as well as spoken questions? Text E — One board trial: 14 of 20 members posted a question. No check recorded which questions helped a project or why six members did not post. Text F — Member notes: 8 of 12 voluntary respondents said they wanted a spoken question time. The club has 20 members and the other eight did not reply.

Through your agreed route, contribute a recommendation with an accurately attributed detail, its relevance and a limit. Exchange and respond to a different idea with a relevant reason/detail. If working with the teacher, they may read: ‘Eight replies want speaking, so I would stop using the board.’ Reflect on whether your view stayed, changed or became more qualified, and what evidence would matter next. Retain a note or agreed record of your point, other idea and reply. Agreement and number of turns are not scored.
