

Follow-up A · build matched groups

RR02 · v0.1.7 · Student · Follow Up · page 1 of 2

Use this after your teacher has chosen the complete-group route. Drawings work; counters are optional.

RR02-R1 · Targeted follow-up A

A model uses 2 triangle counters for every 3 circle counters. Sketch three complete groups. Count both totals. Does 6 triangles with 7 circles meet the rule? Explain.

Follow-up B · explain the shared factor

RR02 · v0.1.7 · Student · Follow Up · page 2 of 2

Use this after your teacher has chosen the factor-explanation route.

RR02-R2 · Targeted follow-up B

A pattern uses 4 square tiles for every 7 round tiles. A larger pattern has 21 round tiles. Find the square tiles. Show the factor in both quantities and explain it in words.
